

## ESP2 Ironing Press

Singer has just released the new ESP2 Electronic Iron Press. This new press pumps steam from the water tank to give a true burst of steam and a professional looking finish.....

### Electronically Pumped Variable Steam

Steam helps eliminate wrinkles and set creases. The ESP's steam is pumped electrically from the 300ml water tank to give a true burst of steam, not just a squirt. The steam openings cover the entire pressing area, ensuring the total pressing area receives the benefits of steam.

### 24" x 9" (63cm x 26cm) Pressing Area

Since the ESP's pressing surface is almost 14 times larger than a conventional iron, pressing time is greatly reduced. In a fraction of the time large fabric surfaces such as table linens and draperies can have a professional-looking press.

### No-Steam Option

The press can operate as a dry press which is ideal for delicate fabrics.

### Power and Temperature Ready Indicator

The power and temperature ready indicators take the guess work out of knowing the press temperature. Choose the nylon, silk, wool, cotton or linen setting. The ESP's indicator light will be illuminated when it reaches the correct temperature. The press will remain at a consistent temperature, protecting your fabrics.

### Electronic Alarm

The alarm sounds every 10 seconds if the handle is left down. The alarm will remind you to lift the handle to ensure that fabrics are not exposed to the heating plate too long.

### Plenty of Space at the Back of the Pressing Board

There is ample room behind the pressing board for the holding table cloths, bed linens, draperies, and other large items as they are being pressed.

### Safety Shut-Off

If the handle is left up for 15 minutes the power to the heating unit is stopped. The safety shut-off also works if the handle is left down for 10 seconds. Automatic Safety Shut-Off offers you peace

### Portable

Lock the handle and it conveniently stores in a vertical position. Weighing only 22 pounds allows the press to easily be transported.

### Warranty

The ESP-2 has a limited 1-year warranty. Your Ironing Press is warranty to be free of defects in workmanship and material for one year from the date of purchase.

### Why own a press?

Pressing will not distort the fabric grain or stretch fabrics the way ironing does. Take better care of your fabric and reduce shine commonly caused by ironing.

Improve quilt-piecing accuracy by pressing instead of ironing. Pressing helps eliminate the possibility of distorting the fabric, making for more exact piecing.

Projects that require fusing are more precise when using a press.

The ESP-2's streamline design can be operated with one hand; reducing the strain commonly associated with ironing. The press can be placed on a table so the operator can be comfortably seated while using the press.
